

Ammermann Umwelttechnik GmbH/Aquatec Weber Sp. z o.o.

<http://www.ut-weber.de>

Bilateral Meetings

- (10:00 am - 4:00 pm)

Description

Umwelttechnik Weber is a German company which operates on the European market of sewage treatment plants for more than 20 years. The main aim of our company is the production, assembly and distribution of domestic sewage treatment plants. We sell more than 4500 of our products per year. In our region we also carry on all maintenance works. Because of that fact and our experience, knowledge we improve our technology. Therefore, the new systems AquaPur and AquaTop were developed and tested according to the latest guidelines of EN 12566 part 3.

We have a branch in Poland - **Aquatec Weber**, ul. Inżynieryjna 8, Nowa Sól. The company fulfills orders for individuals and businesses with large investments and tender bids. We sell, install and provide consultancy in the field of biological wastewater treatment plants. The company also carries out maintenance work. The main area of our activity is the production of domestic biological treatment plants based on research-proven SBR method and draw on long-term experience of parent company in Germany- Umwelttechnik Weber.
